

WEEK 2

Strand : Introduction to computing		Class : B7
Sub Strand : Components of Computer		Duration :
Content Standard : B7.1.1.1. Examine the parts of a computer		Date :
Indicators : B7.1.1.1.3. Examine the uses of the output devices:		Day :
Key words : speakers, projector, headphones		
Resources : Set of computer, Video /pictures, wall chart		
Activities For Learning & Assessment	Learners Resource Page Ref.	Progression
Starter (5 mins) Using questions and answers, find out what learners already know about output devices. Share with learners the performance indicators. Main (35 mins) Engage learners to watch video or pictures of output devices in use.  The image shows five different types of computer output devices arranged in two rows. The top row features a projector on the left, a monitor in the center, and a set of speakers on the right. The bottom row features a printer on the left, a pair of headphones in the center, and another printer on the right. Each device is labeled with its name: 'Projector', 'Monitor', 'Speakers', 'Printer', 'Headphone', and 'Printer'.	Computing Curriculum Pg. 3	Learning how to identify and use output devices

Guide learners to demonstrate the use of output devices in a computer laboratory or classroom. Let learners explore the advantages and disadvantages of output devices. Reflection (10 mins) Use peer discussion and effective questioning to find out from learners what they have learnt during the lesson. Take feedback from learners and summarize the lesson. Ask learners in turns to demonstrate the use of output devices.		
Homework/Project Work/Community Engagement Suggestions		
• What is an output device? • Mention any five output device you know. • State the functions of the output devices stated above		
Cross-Curriculum Links/Cross-Cutting Issues		
Potential Misconceptions/Student Learning Difficulties		
Learners inability to distinguish between input and output devices The facilitator can arrange to use the nearby school's computer lab		

Strand : Introduction to computing		Class : B7
Sub Strand : Components of Computer		Duration :
Content Standard : B7.1.1.1. Examine the parts of a computer		Date :
Indicators : B7.1.1.1.4 Examine full-sized external hard drives, hard drive speed, disk caching, Storage portable hard drives, Optical Discs and Drives		Day :
Key words : magnetic storage devices, portable hard drives, Optical Discs and Drives		
Resources : Set of computer, Video /pictures, wall chart		
Activities For Learning & Assessment	Learners Resource Page Ref.	Progression
Starter (5 mins) Recap with learners to find out what they already know about storage devices. Share with learners the performance indicators. Main (35 mins) Guide learners to Identify magnetic storage devices, portable hard drives/Optical Discs and Drives or pictures of these items to class. Learners to discuss the features of hard drives/Optical Disc storage media. The diagram shows a top-down view of a hard drive. A central spindle holds several circular platters. A read/write arm is mounted on an actuator, which is connected to a ribbon cable. Labels with leader lines point to the Spindle, Read/Write Arm, Actuator, Platters, and Ribbon Cable. Let learn 1. a floppy 2. a compact disc storage devices. to store data.	Computing Curriculum Pg. 3	Learning how to identify and use storage devices

Explore the different write speeds of these storage devices. 1. SD cards will read and write at speeds of 12.5MB/s 2. a typical 7200 RPM HDD will deliver a read/write speed of 80-160MB/s 3. the write speed of 2.0 USB can be as slow as 4MB per second and as fast as 8MB/s. Explore the differences in the various Hard Disk Drives (HDD). Reflection (10 mins) Use peer discussion and effective questioning to find out from learners what they have learnt during the lesson. Take feedback from learners and summarize the lesson. Ask learners how the lesson will benefit them in their daily lives.		
Homework/Project Work/Community Engagement Suggestions		
• What is a storage device? • Identify the primary storage devices of a computer. • Identify any four secondary storage devices of the computer		
Cross-Curriculum Links/Cross-Cutting Issues		
Potential Misconceptions/Student Learning Difficulties		
The facilitator can arrange to use the nearby school's computer lab
